## Leprechaun Bait

### Ingredients

- 12 ounces white candy melts
- 6 ounces green candy melts
- 3 cups popcorn popped
- 3 cups mini pretzel twists
- 3 cups Crispix Cereal
- 4 cups Lucky Charms limited edition clovers
- 10.5 ounce bag of Mint M&M's

### Instructions

- In a large bowl combine Rice Chex, Lucky Charms, pretzels, popcorn and M&Ms. In a heat-safe bowl, melt the white chocolate in the microwave for 30 seconds on 50% power. Stir and repeat until the chips are completely melted.
- Pour the melted white chocolate over the cereal mixture. Stir carefully to combine, as to not crush the Rice Chex. Stir until the mixture is completely coated with the white chocolate
- Pour mixture onto wax paper or parchment paper to dry and spread it out. Repeat with melting the green chocolate, then spoon over the mixture. Then add the sprinkles.
- Allow to set until white chocolate has hardened and then break up into pieces.
- Store in an air-tight container.

## Dates to Remember

- March 3rd – Employee Appreciation Day
- March 8th – International Women's Day
- March 12th – Daylight – Saving Begins
- March 17th – St. Patrick's Day
- March 20th – First Day of Spring
- March 31st – Cesar Chavez Day

## Personal Umbrella Insurance

### Why is a personal Umbrella Liability Policy important?

It works to fill the gaps in your coverage and provides the following benefits:

- When litigation ensues, it's typically for a large amount. If you get into a car accident and injure several people, you could be sued for millions of dollars; well beyond the limits of your automobile policy. You can also be held responsible if your dog bites someone, if your child injures another kid in a fight at school or if a handyman hurts himself at your home.
- Umbrella policies cover legal fees because the insurance company assumes the risk, not you.
- Coverage is inexpensive and easy to obtain. Just give us a call to add it on to your current policy.
- You'll have peace of mind knowing that you are covered in case of a fluke occurrence.

### How much coverage do you need?

Take into consideration your total personal assets and your potential for personal risks when determining how much coverage you need. A wide range of factors, such as whether you have hired help, if you have teen drivers at home or if you operate your business out of your home, will determine how much coverage is appropriate for your circumstances. What are the policy limits? A \$1 million limit is typical and higher limits are available. Contact us today to determine how much coverage is right for you.

## Quote of the Month

"May you have all the happiness and luck that life can hold and at the end of your rainbows may you find a pot of gold."

## Car Care Tips

**Check the battery:** You can't get where you are going if the car won't start. Signs of a weak battery: dimming headlights or interior lights; power windows that take longer than usual to go up and down.

**Check the brakes:** Nothing is more crucial to your safety than your brakes, so get them checked. Trouble signs: pulling to one side when you hit the breaks, squeaking or grinding noises and a brake pedal that feels too soft.

**Inspect the tires:** Worn-down tires make it hard to stop, even if your brakes are in good order. Try the coin test on your tires: insert a quarter into several grooves across each tire. If part of Washington's head is always covered, you still have 4/32 inch of tread left and can probably drive safely. If you have less tread, it's time to think about replacements. (A definite danger signal comes when you slip a penny into a groove and the tread does not reach Lincoln's head. Even if your tires treads are OK, make sure you keep them inflated to the pressure listed on the placard visible when the driver's door is open. You can boost your gas mileage by 3% or more and make the car safer as well. To get an accurate reading, check the pressure of tires when they are cold, not when you have been driving.

**Check the belts and hoses:** A broken belt or hose can cause problems ranging from the loss of power steering to an overheated engine, but these parts are easily overlooked. Look for cracks and peeling on the belts, softening on the hoses—or ask your mechanic.

**Test the air conditioning:** Turn on the cooler full blast and make sure it reaches that max chill in short order. If you suspect problems, get a mechanic to check it out.

## Referral Rewards Program

Its so EASY...

1. Tell your friends, family, coworkers, and anyone else you know about Saber Insurance Agency.
2. Have them mention YOUR NAME when they call.
3. You automatically WIN!!!

EVERY REFERRAL INCREASES YOUR ODDS IN WINNING IN OUR END OF THE YEAR MEGA JACKPOT!!!
